

NAME

Scandrives – A Drive scan, detect and mount script (Scandrives)

SYNOPSIS

Scandrives

DESCRIPTION

Scandrives - Scans drives and auto mounts them.

FEATURES

Scandrives offers the following features:

- Automatic detection of filesystem and type USB etc.
- Support for all filesystem types provided the tools are installed.
- Optional auto-mounting of detected drives during bootup.

COMMAND SWITCH USAGE

Scandrives supports the following command-line switches:

If an option or flag is marked as [XXX], it is optional. Options specified with <XXX> are required. Specifying no switch is the same as using the **--help** switch.

-S **--service** set scan drives as a service
-s **--scan** scan for drives(s)
-v **--version** Display version number and exits.
-h **--help** this help message

OPTIONS

Service **-S** , **--service**
 disable
 Disables Scandrives service, stops the service and reports the status.

 enable
 Enables Scandrives service, starts the service and reports the status.

Scan **-s** , **--scan**
 scans for all drives and adds fount entries to your /etc/fstab.

Version **-v** , **--version**
 Display version number and exits.

Help **-h** , **--help**
 Show help.

SEE ALSO

mount(1), **fstab(5)**

The full documentation for this tool is maintained as a Tex-info manual. If repostorm and the info program are properly installed at your site, the command

info scandrives

should give you access to the complete manual including a menu structure and an index.
